Exam Question Practice: Foundation

Show any working out

1)

Frank and his 4 children are going to Bristol by train. An adult ticket costs £36 and a child ticket costs £18.

Frank has a family railcard which gives $\frac{1}{3}$ off adult tickets and 40% off child tickets.

Work out the total cost of the tickets when Frank uses his family railcard.

2)

Paulina is driving to France for her holiday.

She will drive a total distance of 360 miles.

Paulina sets off at 05:45.

It takes her 1.5 hours to travel the first 90 miles.

Use this information to estimate the time Paulina will arrive.

On the next page is an exam questions based on Frequency Trees, if you are struggling try to complete the tree at least

30 people took a literacy test and a numeracy test.

23 of the people passed the literacy test.

(a) Use this information to complete the frequency tree.

(b) Write down the number of people that passed the numeracy test.

(1)

(Total for question 1 is 4 marks)

500 people were surveyed.
All of the people were either left handed or right handed.

53 of the people are left handed.
26 males are left handed.
231 of the people are male.

(a) Use this information to complete the frequency tree.

(3)

One of the **left handed** people is chosen at random.

(b) Write down the probability that this person is female. (2)

(Total for question 3 is 5 marks)
