

Years 7, 8 and 9 **Weekly** Home Learning
For Friday 3rd – 10th July

First of all, well done for all the hard work you have put in since we left school and for all the work you have submitted. We've had so much brilliant stuff sent in that we've been inundated!

For your final task of the school year, I'd like you to look at the tasks you've been set over the last 3 weeks; even further if you prefer! Pick out a set of questions that are harder than what you completed at the time – So if you did the aiming for grade 3 questions try the ones for aiming for grade 5 to give you a real challenge to get stuck into!

If you have completed all the tasks and are happy with what you've done, I'd like you to log in to Educake and set yourself some questions on a topic of your choice. There is a button that says "Set yourself a test". Click on to this and then you're away! This will allow you address any gaps or areas that are personal to you. If you have any issues, please email your Science Teacher, who will guide and support you where needed.

I hope you have a nice relaxing break and make the most of any sunshine when it finally reappears!

Take Care,

Mr Schuller – Head of Science
