

## These are the houses you have to choose from

- Use the map carefully. Look at what part of the city the houses are in, think about what you know about that part of the city, and look at what's nearby (use the key)
- Think about the house itself – what features does it have? Will it have enough space? Would it need money spending on it once the people had moved in?
- Don't forget the price of the house! The people are all very different and would be able to afford different things e.g. Josh probably doesn't have huge amounts of money!

**House 1**

**Mid-terraced**

- ◆ Kitchen
- ◆ Living room
- ◆ Two bedrooms
- ◆ Bathroom extension in backyard
- ◆ In need of some modernisation

**£100,000**

- ◆ Utility room/study
- ◆ Garage
- ◆ Spacious gardens at front and rear

**£600,000**

There's some useful info about the Burgess model and the different parts of the city, on the next page

# General Burgess model info

CBD - The oldest part of the city. Full of businesses, shops, banks, restaurants, pubs and clubs. There aren't many houses & little open space

Inner city - Used to be full of factories and terraced houses. Most factories have now closed and house have been modernised

Suburbs - Semi-detached or detached houses. More open space and gardens available

Rural-Urban Fringe

Rural-urban fringe - Some larger homes, areas of open space, modern industrial areas and some leisure facilities e.g. golf courses
